HILMI FARREL FIRJATULLAH

FRONT-END DEVELOPER

Depok, West Java | hilmifarrel03@gmail.com | Hilmi Farrel Firjatullah Web Portfolio | LinkedIn Hilmi Farrel

SUMMARY

Software Developer with over 2 years of experience specializing in Front-End development using React, Next.js, and PHP Laravel. Proven track record in refactoring large-scale organizational websites and developing centralized management systems for government level projects. Strong focus on building high-performance, user-centric digital solutions

EDUCATION

STT Terpadu Nurul Fikri **Sept 2026 - Expected Graduation: August 2030**

Undergraduate Student in Informatics Engineering

- Focusing on fundamental programming and software engineering concepts
- Actively expanding technical skills through campus tech projects and communities

SMK Negeri 1 Depok **Jul 2022 - May 2025**

Vocational Highschool Software and Game Development

- Specialized in Software Engineering and Game Development
- Developed multiple real-world projects through internships and School Assigment Project

PROFESSIONAL EXPERIENCE

Front End Developer **November 2025 - Current**

YBB Organization (Youth Break the Boundaries)

- Refactored the entire Youth Break the Boundaries (YBB) web ecosystem using Next.js to optimize performance, scalability, and code maintainability.
- Streamlined participant registration flows, ensuring a seamless user experience for global program applicants.

Front-End Developer **January 2025 - October 2025**

PT Ciptadra SoftIndo

- Developed and maintained complex web applications for Depok City Government, including UMKM management and healthcare platforms
- Resolved critical UI/UX bugs and optimized front-end stability, significantly improving the reliability of public-facing services.

Front-End Developer - Internship **December 2023 - October 2024**

PT Ciptadra SoftIndo

- Learned best practices for code optimization, responsive design, and accessibility standards.
- Collaborated in group projects within real-world work environments, practicing teamwork and project management.

PROJECTS

Youth Break the Boundaries All Website Programs **2025**

Youth Break the Boundaries - *Next.JS, TypeScript, Tailwind CSS*

- Redesigned the YBB website with a modern UI, improved visual identity, and clearer content structure.
- Improved call-to-action placement and user flow for faster access to key actions.
- Implemented responsive layouts and enhanced user flow for better usability across desktop and mobile.

Dkerens – UMKM Service Portal **2025**

PT Ciptadra SoftIndo - *Next.JS, Golang*

- Engineered a dedicated registration module for Halal and HAKI certifications, simplifying the application process for local business owners.
- Enhanced product catalog integration with marketplace data, only approved UMKM products are displayed to improve quality and reliability.
- Integrated real-time updates on kiosk and tenant availability across multiple locations (e.g., ITC, Dmall), helping UMKM efficiently find and manage selling spaces.

Dkerens - UMKM Kota Depok Management **2025**

PT Ciptadra SoftIndo - *Laravel 10, PHP 8.1, Bootstrap 5, Golang*

- Build a centralized system to manage UMKM profiles, products, workforce, training, and licensing.
- Built data analytics and visualization features (graphs, charts) for better decision-making.
- Improved business registration processes, enabling structured administration and easier access to government support.
- Enhanced market visibility for UMKM owners and supported local economic growth.

CiptaLife - Healthcare Platform for Depok's Health Department **2023 - 2025**

PT Ciptadra SoftIndo - *Next.JS, Golang*

- Developed a centralized platform integrating patient management, scheduling, and analytics dashboards.
- Enabled real-time monitoring of disease trends, patient volume, and resource allocation for improved decision-making.
- Implemented secure, scalable web architecture with integration to national health APIs (BPJS, PCare).
- Streamlined healthcare workflows, reducing manual processes, enhancing patient experience.

MuslimTime – Islamic Prayer Web Application **2025**

Individual Project - *Next.JS, TypeScript, Tailwind CSS, Nodemailer*

- Designing a lightweight, ad-free prayer time platform with location-based notifications and daily Islamic content.
- Focusing on UI/UX design, performance optimization, and creating a clean, accessible digital space for Muslim users.
- Built using modern web technologies to ensure scalability and cross-device compatibility.
